**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-11, 13-18, 20, 22-30, and 33-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Embree et al (6277164).

Embree et al discloses the claimed invention as recited in claims 1-11, 13-18, 20, 22-30, and 33-34. Embree et al disclose an appliance having a main body (111) with a rolling surface (90b and the other wheel), A shell (123b&232), fluid inlets and outlets (30), inlet and outlet ducts (240), a means of separating matter (80 or fliter).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over Embree et al (6277164) in view of Park et al (5839156).

a. Embree et al are discussed above and disclose the claimed invention except for an impeller. Park et al discloses that the claim would have been obvious because technique for exchanging motor (22&23) is known improving vacuum cleaners with different known motor was part of the ordinary capabilities of a person of ordinary skill in the art in view of the teaching of the exchanging motors for simple improvements to achieve a predictable result.

***Allowable Subject Matter***

2. Claim 12 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The 892 form discloses prior art being made of record.
